DETAILED ACTION

- 1. This Office action is in response to Application No. 09/829,573, filed on 04/10/2001.
- 2. Claims 1-22 are pending.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 1-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pargee, Jr. (U.S. Pat. No. 4,422,093) in view of Stern (U.S. Pat. No. 6,591,247).

Serial Number: 09/829,573

Art Unit: 3621

As per claims 1, 3-6, 8, and 10-22, Pargee substantially discloses a virtual service that employs the

full facilities of a satellite television communication channel, comprising the steps of:

obtaining information about earnings and expenses based on expenses incurred by content providers

(content providers or satellite television broadcasting, cable television) supplying users with

recording devices compatible with contents offered by the providers (see., abstract, col 3, lines 15-30,

col 6, lines 18-38). Pargee fails to explicitly discloses advertisements and fees included in the

contents. However, Stern discloses an advertising and payment method/system to disseminate

information concerning multiple products. The advertisements information is associated with various

products or contents (see., abstract, col 1, lines 37-67, col 3, lines 12-32, col 4, lines 46-67, it is

obvious to recognize that satellite or cable broadcastings provide earnings for service provide to

consumers). Therefore, it would have bee obvious to a person of ordinary skill in the art at the time

the invention was made to modify the television burst service of Pargee by including the limitations

detailed above as taught by Stern because this would advertise consumers in the television industry

while ensuring that consumers is ready to perceive the message content of the advertisement.

As per claims 2, and 9, Pargee discloses the claimed method wherein said services constitute

electronic commerce practiced by virtual shops (see., abstract, specifically wherein it is stated that

a virtual service that employs the full facilities of a television communication channel on an

intermittent basis, col 3, lines 3, lines 19-67).

Claim Rejections - 35 USC § 101

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

6. Claims 1, 13, and 19 are rejected under 35 U.S.C. 101 because it is directed to non-statutory subject matter, specifically, as directed to an abstract idea.

Claims 1, 13, and 19 represent an abstract idea that does not provide a practical application in the technological arts. There is no computer performing any step, therefore, Applicant is advised to embed a computer or processor or module into claims 1, 13, and 19 in order to overcome this 101 rejection. Appropriate correction is required.
